

astar\_heuristic< Graph,  
CostType >

```
classDiagram
    class astar_heuristic {
        < Graph, CostType >
    }
    class distance_heuristic {
        < Graph, CostType, LocMap >
        + distance_heuristic()
        + operator()()
    }
    distance_heuristic --|> astar_heuristic
```

The diagram consists of two class boxes. The top box, representing the base class, is divided into three horizontal sections. The first section contains the text 'astar\_heuristic< Graph, CostType >'. The second and third sections are empty. The bottom box, representing the derived class, is also divided into three horizontal sections. The top section contains the text 'distance\_heuristic< Graph, CostType, LocMap >'. The middle section is empty. The bottom section contains two lines of text: '+ distance\_heuristic()' and '+ operator()()'. A blue arrow with an open triangular head points from the top section of the bottom box to the bottom section of the top box, indicating an inheritance relationship.

distance\_heuristic  
< Graph, CostType, LocMap >

+ distance\_heuristic()  
+ operator()()
